

Year 5 Half Term Project

Autumn 1

Solar System 3D Model Project

This half term our science topic is Earth and Space. Your project is for you to create your own solar system model and an information booklet/leaflet to go with it. Your project will then be displayed in the classroom or school foyer. There are no limits to the project; you can use any materials!

I encourage you to be creative and show what you have learned. There are some basic rules for your project:

- You must have the Sun and all 8 planets
- The Sun needs to be the biggest object. Try to keep the planets in proportion. In other words, Earth should not be larger than Jupiter
- All objects must be labeled correctly and where I can easily read it
- You may use anything you like to do the project. For example: coat hanger, a box, dowel rods, Styrofoam balls, whatever you would like!

Try your best because the whole school might get to see it!

This project is due by Monday 1st October 2018

Turning it in early is encouraged!
