

BLOG 3

DAY 4

We woke up, brushed our teeth and got into our waterproofs. First, we visited the sheep and lambs. We watched Aled, the sheep farmer, spray tar on the new lambs. This is so that foxes can't come and eat them as the smell tricks them into thinking there is a fire. Unfortunately, badgers also could eat the lambs and there is nothing we can do to prevent this. We had breakfast of crumpets. Also, in the morning we had a very nice shop in our dining room where we could buy bookmarks, sketchbooks, bath bombs, magnets, clothes and more...

For lunch we had delicious potato soup with fresh homemade bread. Then we planted some beetroot seeds. Finally we walked the donkeys into the field. In the evening we ate pasta bake with garlic bread, followed by chocolate cookies.

DAY 5

We woke up, got changed and then gave food (barley) to chickens, turkeys, ducks and geese. Then we went to the hard bit: the pigs (we had to distract them to put the food into the trough). After all of that we went on a long walk to St David's. We visited St David's Cathedral. We met a young choral scholar and he talked to us about life as a chorister. Lara (me) got dressed up as a chorister - she wore a cassock and then a surplus over the top. Choristers can only wear a surplus after they have sung for a whole year. We also went on a treasure hunt. We had photos and had to find where they were in the sacred place. In the cathedral there was a mysterious door that no one has the key to open! Afterwards, we met a woman who told us the story of the last supper. Then we went upstairs and had our delicious lunch which consisted of: sandwiches, apples, custard creams and orange squash. After this we went to the park and bought a snack with our spending money.

Once we had arrived back to the cottage, we had a short break and then we used our wheelbarrows to move heavy logs on the farm because they were too big for firewood. We wore protective gloves - one side is orange and rough to protect your palms. We are now full of sausages, mashed potatoes and peas! Not only this, we had vanilla doughnuts which were mouthwatering and tasty. Group A went out again at 6pm for a night shift to feed the goats and put them back in their pens. We also milked Dice (the nanny goat, which means a goat that has already been pregnant).

Today was a great day and we hope tomorrow will be even better. Bye!
