

# Science Project Homework

Due date: 5th February 2021

As part of our Science learning, your homework project will be to make a booklet about rocks.

Please fill the booklet with lots of facts about rocks:

- how are they formed
- where can you find them
- what types of rocks do you know
- what are the three main types of rocks

Draw or stick in pictures of different rocks, label them and make sure you write facts about them.

Make your booklet as informative and interesting as you can.

You can include pictures of volcanoes, lava, eruption, sea creatures, layers of sediment etc.

You can use the internet to find facts about rocks. Please include the titles of the books if you use any for research.
