

Year 4

Spring Term Science Project

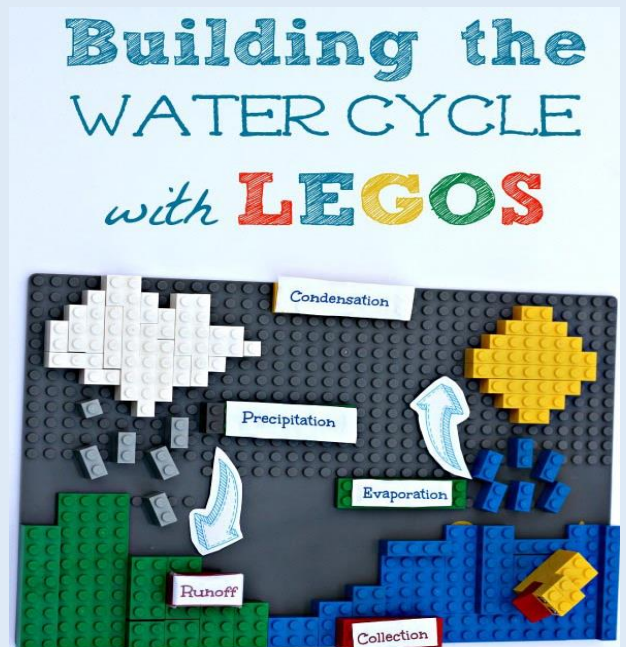

Dear Year 4, in this term we will learn some splashing new facts about the different stages of the water cycle!

Your project is to create a model or a poster about the water cycle and an information sheet to accompany it.

We haven't learnt about this yet, so that means you need to use the internet and books to find information about evaporation, condensation, precipitation and collection! That is a lot of words ending with – ation! 😊

Here are some great project examples made with play dough and LEGO bricks:

Good luck with your project! The due date is 25th January 2021.
