BLOG 2

Day 2 of our spectacular trip in Wales, Lower Treginnis Farm.

Welcome to our amazing journey in Wales. Before anything else this morning, we all fed the animals. Group A went out to feed the pigs, Group B was feeding the goats and they milked the nanny goat and finally Group C went to feed the sheep.

After we fed all the hungry animals, we had our own breakfast! The options were bacon, eggs, toast, cereal and porridge. The eggs and bacon were both from the farm and they were delicious. Next, Group A helped make a scrumptious batch of Welsh cakes for St David's day. Meanwhile, Group B planted wildflowers and Group C did some gardening; moving soil to a place where they can grow crops.

Afterwards, Group A went to see the donkeys... we scooped some poo (which was absolutely disgusting!) following that we groomed the super-soft donkeys. We also took turns to take them for a walk round the field. Group B did a coastal walk with breath-taking views where we could see Ramsey Island with only two people living there. Ramsey Island is a special location for bird protection. We used binoculars to spot some amazing birds.

During snack time, we had pancakes (because of Shrove Tuesday) and there was lemon, oranges and sugar and they were absolutely mouth-watering. After break, we had free time where we could get creative and play games. Some of us played football, whilst others made clay or created eggcellent watercress pots (with egg shells).

After lunch we did various activities. Group C did such a long coastal walk, where we saw sheep along the way. We also fed the sheep some grains and barley. We all did log sawing for the kitchen and the fire activities and finally we all just swapped jobs.

Group B ended the day feeding six ginormous pigs! We then had a look at the poultry, the most exciting part was the chicks; it takes 21 days for a chick to incubate in its shell.

Thank you for reading our blog and we will give out more information tomorrow, goodbye!
